## 1 Background

General Service Administration's (GSA) Office of Telecommunications Services (OTS) currently provides mission critical telecommunications and information technology services to government agencies through the current suite of acquisition vehicles: Networx, Washington Interagency Telecommunications System 3 (WITS 3), Regional local service contracts as well as tariff services. With the GSA contracts set to expire; GSA initiated a follow-on acquisition called Enterprise Infrastructure Solutions (EIS) that merges the capabilities of the previous vehicles and meets agency needs for the next generation of telecommunications and networking solutions. The expiring contracts were originally extended to 2020; however, due to delays in transition and requests from agency customers, GSA collaborated with them to determine a need to further extend the contracts to May 2023.

As a condition of extending the expiring contracts, GSA requires agencies to meet certain critical milestones in order to be eligible to continue using the contracts during the extended period. The first of those milestones was to award all task orders by September 30, 2019. As of February 29, 2020, only 6 agencies had awarded all task orders. In fact, of approximately 120 solicitations expected to be used for task order awards, fewer than half had been submitted to GSA for scope review. This delay in completing the acquisition phase of transition has created significant risk that agencies cannot disconnect their services from the expiring contracts by the target deadline of September 30, 2022.

To mitigate this risk and to enforce the eligibility condition for the extension of the expiring contracts, GSA initiated this Transition Closeout project. The goal of this project is to ensure all services are disconnected from the expiring contracts by May 2023.

This project follows a similar approach taken in the transition to Networx. GSA kicked off the project on December 15, 2011 and, between February and July 2012 through a series of targeted warning notices to agencies and subsequent disconnect orders to FTS2001 contractors, GSA ordered a gradual disconnection of services for approximately 100 Agencies and 33,500 active services. An additional twelve agencies were extended into an Emergency Action Period.

## 2 Objectives

GSA will initiate this Closeout Project to complete the disconnection of services from the expiring contracts in a phased approach. This approach is intended to achieve the following objectives:

- Avoid a large-scale disruption in telecom and networking services across the Federal Government at the expiration of the contracts
- Minimize the risk of adverse impacts to agencies' operations
- Reduce the expense of administering the expiring contracts simultaneously with the EIS contracts
- Provide agencies that have substantiated needs with contracts on which to continue services without interruption

- Decrease and stop the growth of services on expiring contracts that would only add services that then have to be transitioned.

### **3 GSA's Action Plan**

GSA is taking a twofold approach to implementing this plan. GSA will enforce the requirement to limit use of the extended contracts to those agencies who are meeting certain critical milestones in order to be eligible to continue using the contracts. In addition, GSA will take steps to minimize the growth of services on the extended contracts, which would increase what has to be transitioned, by freezing contract modifications and orders for new services. An overview is below, and detailed processes are described later in this plan.

#### **3.1 Limiting Users on Extended Contracts**

Beginning after March 31, 2020, GSA will begin to limit users on the expiring contracts. The first step will be to limit users to those that have active services, on the date the extension for each respective contract is executed. For Networkx Universal contracts, this will be effective on April 1, 2020; effective dates of the remaining 89 contracts vary according to each contract's term. After that limiting users will involve GSA's ordering a gradual disconnection of services for agencies that have not made adequate progress in the transition to EIS. This will be accomplished through a series of targeted warning notices to agencies, after which they will have the opportunity to appeal not to be removed.

If the appeal is not granted, GSA will subsequently notify Networkx, WITS 3, and Regional local service contractors of agencies that are removed from the Networks Authorized User List (NAUL), which specifies the agencies authorized by GSA to use the extended contracts (see Section H.2.3.a and b of those contracts). The contractors must then disconnect services for the agencies removed and cease billing per the terms and conditions of those contracts.

GSA intends to conduct the removal of authorized users in phases. GSA will determine the phasing based on the agency's completion of awarded task orders on EIS, other indications of activity, and progress in transition, along with considering other special circumstances. The agencies will be tracked and specified on the NAUL at the level as defined in the Transition Entity list; generally that is the department level for most large agencies, and Native American Tribes will be treated individually. Most agencies' disconnects will be completed no later than September 30, 2022. GSA may approve, under extreme circumstances, a few specific agencies to extend the use of the contract through an "Emergency Action Period" (EAP) with disconnects to be completed by May 31, 2023.

#### **3.2 Freezing Contract Modifications and Orders**

Effective October 1, 2020, GSA will implement controls on its extended Networkx, WITS 3, and Regional local service contracts by freezing all future growth on these vehicles.

Specifically, on the Networkx (Universal and Enterprise) and WITS 3 contracts, GSA will cease processing all contract modifications for new requirements. This control refers to modifications to the GSA contracts, not to agencies' task orders. For GSA's Full Service Program, including the Regional local service contracts and tariffs, GSA will no longer fulfill any requests for additional services. All new services required should be provided under the EIS contracts.

GSA understands that in very rare cases, an agency may have a need that requires GSA to modify the extended contracts. To request a modification exception after the October 1, 2020 restriction date, the Agency Transition Sponsor (ATS) must provide the justification and required time-frame for the new requirement to the Senior Executive for Telecommunication Services attn.: Supplier Engagement. The justification should include why the requirement cannot be fulfilled under EIS. GSA will review and adjudicate the exception request. If approved, the contractor proposing the modification to GSA must include documentation of the approval when submitting the modification proposal. Note that agencies removed from the NAUL will be prohibited from requesting any modifications on extended contracts.

#### **4 Immediate Actions by GSA Stakeholders**

The following are to be completed while this plan is undergoing GSA review and approval. These steps are necessary to ensure the project begins timely.

- Prepare draft list of Non-responsive agencies for Phase 1.
- Provide draft list of Non-responsive agencies to Networkx and WITS 3 contractors as well as EIS contractors to allow them to get agencies to contact GSA.
- Verify list of ATSS, Lead Transition Managers (LTMs), and Transition Ordering Contracting Officers (TOCOs).
- No later than March 11, 2020 send letter from Assistant Commissioner, Office of Information Technology Category (ITC) FAS to ATS, cc: LTM and TOCO explaining closeout project. Provide a copy to all stakeholders, including contractors. See Appendix D: Letter to Agency Transition Sponsors March 2020.
- Conduct Webinars with small agencies for their increased awareness. Small agencies are particularly difficult to reach as there are many of them, they have very small staffs, and their contacts change frequently.
- Prepare draft of initial NAUL, listing all agencies with active services on the extended contracts, compose companion letter explaining NAUL, and share with contractors and GSA Full Service managers to ensure clarity. Resolve any questions or concerns.
- Work through the Contracting Officer Representatives (CORs) to have Networkx & WITS contractors appoint a Point-of-Contact (POC) to communicate with for disconnects.
- March 30, 2020 deliver initial NAUL to Contracting for posting to Network Hosting Center, transmittal to contractors and GSA Full Service managers, and posting to Networkx and WITS 3 websites. See Appendix E: Networks Authorized User List (NAUL) March 2020.

## 5 Transition Timeline and Milestones

### 5.1 EIS Transition Program

GSA is managing the EIS Transition program according to the schedule in the figure below and the critical milestones defined in the table that follows.

Activity	Milestone Date
Agencies issue Fair Opportunity (FO) solicitations to industry	March 31, 2019
Agencies award EIS task orders	September 30, 2019
Agencies achieve 50 percent (50%) transition of services	March 31, 2021
Agencies achieve 90 percent (90%) transition of services	March 31, 2022
Agencies achieve 100 percent (100%) transition of services (disconnected)	September 30, 2022
Networx/WITS/Regional contracts expire	May 31, 2023

### 5.2 Transition Closeout Project Schedule

Consistent with the schedule for the EIS Transition program, the Closeout Project will follow the schedule below.

Task Name	2015	2016	2017	2018	2019	2020	2021	2022	2023
CIOs deliver Transition Plans to ITS*		 10/31							
Agencies Issue Solicitations to Industry*			 3/29						
Agencies award EIS task orders*					 9/30				
Disconnect Agencies Removed from Authorized Users List							 In Phases		7/2020-8/2022
Freeze Networkx and WITS Mods and LSA Orders						 10/1			
Transition 50% complete*							 3/31		
Transition 90% complete*								 3/31	
Transition 100% complete (disconnects)*								 9/30	
Networkx Extension 2						 5/31			
WITS & LSA Extension 2						 5/31			

\*measured and reported monthly

## 6 Limiting Users on Extended Contracts

GSA notified agencies of milestones for transition progress and sent agencies written agreements for them to sign committing to award their task orders by September 30, 2019. In a subsequent memorandum dated July 15, 2019 the Assistant Commissioner for ITC approved the "Plan for Limiting Users on Extended Contracts," outlining the approach for enforcing agencies to meet certain critical milestones to be eligible to use the extended contracts (see Appendix C: Memorandum - Plan for Limiting Users on Extended Contracts). The following are the phases and schedule for implementing and completing the approved approach for limiting the use of extended contracts.

### 6.1 Phases and Target Disconnect Dates

GSA will identify agencies for each phase of removal from the NAUL based on each agency's status as defined by the following progress indicators:

Phase	Progress Indicator	Target Disconnect Dates
1	Non-responsive agencies	Jul 2020
2	Agencies with no solicitations submitted for scope review and agencies indicating they will not transition services to EIS	Sep 2020

Phase	Progress Indicator	Target Disconnect Dates
3	Agencies with no solicitations released to industry	Mar 2021
4	Agencies with solicitations released but not awarded, and not under protest	May 2021
5	Agencies with solicitations released but not awarded because of protest or pending contract modifications	Sep 2021
6	Agencies with solicitations awarded but experiencing contractor-delayed installations and disconnects	Mar - Aug 2022
7	Agencies with task orders awarded but services not expected to cutover by September 2022. This is the Emergency Action Period (EAP).	Sep 2022 - May 2023

## 6.2 Process for Limiting Users

This section describes the general process for phases 1-6 to limit and disconnect users. See Appendix B: Process Flow for Limiting Users for a graphical depiction.

- 1) Limiting Use Transition Project Manager (LUTPM) and Transition Inventory (TI) Lead generate a proposed revision to the NAUL for agencies to be considered for the next phase. The revision will be a NAUL Workbook containing three worksheets:
  - a. Cover Sheet: containing title, version, date, document purpose statement and signature block for the authorizing GSA official.
  - b. NAUL: containing AB Codes, Agency Names, Sub-Agency Names and Active Service Instance Records (SIRs).
  - c. Removed Agencies List: containing agencies for removal from the NAUL.
- 2) LUTPM convenes a meeting of Closeout Core Team to review and come to consensus on criteria for each phase and agencies to be removed from NAUL for each phase. LUTPM documents discussion, factors for each agency's inclusion in the phase, and decisions. For example, an agency which GSA has recently approved a modification exception request should be given strong consideration NOT to be removed from the NAUL.
- 3) LUTPM routes proposed revised NAUL Workbook as recommendation to Senior Executive for Telecommunication Services. Email will include documentation from the meeting.
- 4) Senior Executive for Telecommunication Services concurs and forwards to Director, IT Acquisition Operations to share with Contracting Officers (COs) and, for awareness, cc: Deputy Assistant Commissioner for Acquisition and all Telecommunication Services Division Directors.
- 5) COs send proposed revised NAUL Workbook to contractors, allowing them to prepare and offer feedback on agencies to be removed, should the contractors

be aware of relevant circumstances GSA may not be aware of. The TI Lead will provide a summary spreadsheet of active inventory for each agency, specific to each contractor, giving contractors a chance to identify any major discrepancies or jeopardies back to TI Lead and LUTPM.

- 6) LUTPM prepares warning letters for agencies to be removed from the NAUL and routes to Senior Executive for Telecommunication Services for signature and transmittal to ATS, cc: LTM and TOCO. Warning letters will include a summarized list of active services and SIR counts for each service.
- 7) Agencies will have two weeks to reply to warning letter with appeal explaining why they should not be removed from the NAUL. The Senior Executive for Telecommunication Services will review and adjudicate appeals. LUTPM will document appeal and results for the record.
- 8) LUTPM works with Supplier Engagement to determine the need for and prepare a draft companion letter to accompany the NAUL Workbook.
- 9) LUTPM makes any updates to the revised NAUL Workbook and routes revised NAUL Workbook as recommendation to Senior Executive for Telecommunication Services.
- 10) Senior Executive for Telecommunication Services signs the NAUL Workbook electronically on Cover Sheet within the NAUL Workbook and delivers revised NAUL Workbook to Director, Supplier Engagement for:
  - a. Posting to Network Hosting Center
  - b. Forwarding to Contracting for transmittal to contractors
  - c. Forwarding to the GSA Full Service managers
  - d. Providing copies to the Director, IT Acquisition Operations, Deputy Assistant Commissioner for Acquisition and all Telecommunication Division Directors.
  - e. Posting just the NAUL (not the entire Workbook) to the Networx, WITS 3, and Local Telecommunications Services websites.
- 11) Order Writing Branch initiates disconnects for Regional local services and Networx and WITS 3 contractors disconnect services for removed agencies.
- 12) TI Lead tracks and reports disconnect status and confirms when TI shows removed agencies are 100% disconnected and billing has ended.

### **6.3 Emergency Action Period (EAP)**

As GSA tracks agencies' progress, it will become apparent which agencies are at risk of not completing transition by September 31, 2022. No later than May 31, 2022, GSA will notify these agencies and invite them to take advantage of the EAP. GSA must receive responses from each ATS no later than June 30, 2022. For agencies that request EAP, GSA will revise the NAUL for the period October 1, 2022 to May 31, 2023 to include only these agencies.

### **6.4 Risk Mitigation**

Agencies that cannot complete their transitions by May 31, 2023 will have to take additional action to avoid gaps in their service continuity. GSA is currently developing potential options and will append this plan as those options become available.

## **7 Freezing Contract Modifications and Orders**

To stem the growth of the inventory that needs to be transitioned to EIS, GSA is implementing a freeze effective October 1, 2020 on contract modifications on Network and WITS and new orders on Regional local service contracts.

### **7.1 Initial Conditions**

Because the process for limiting users on extended contracts will begin April 1, 2020, the limitation process may result in the removal of agencies from the NAUL prior to October 1, 2020. Once agencies are removed from the NAUL, no modifications or service orders will be processed and their existing services will be disconnected.

### **7.2 Process for Freezing Modifications and Orders**

This applies only to mods submitted after October 1, 2020; anything in progress prior to this date will be processed through the standard process.

- 1) To receive an exception, the ATS must address a request to the Senior Executive for Telecommunication Services and submit it to Supplier Engagement. The request must include:
  - a. Description of the specific, urgent requirement with services/capability needed and locations/agency components involved
  - b. Required dates of service
  - c. Reasons EIS cannot satisfy the requirement
  - d. Acknowledgement that it's the agency's responsibility to share with the contractor so that the contractor does not spend time developing a modification that won't be approved.
- 2) The Director Supplier Engagement will review the request and make a recommendation to approve or disapprove to the Senior Executive for Telecommunication Services. The review and recommendation will be based on the following:
  - a. Is the agency currently on the NAUL and not expected to be removed within the next six months?
  - b. Can the requirement not be fulfilled on EIS?
  - c. Is it operationally critical and cannot be delayed without mission degradation (impact is more than added cost and/or administrative burden)?
  - d. If answers to all questions above are "yes," recommend "Approve." If any answer is "no," recommend "Deny."
- 3) Supplier Engagement forwards the draft recommended response letter with justification to Senior Executive for Telecommunication Services.
- 4) Senior Executive for Telecommunication Services reviews, accepts or changes recommendation, and sends to IT Category Management (QT3) for concurrence.
- 5) QT3 concurs and sends to ITC for approval and signature of the letter.
- 6) ITC returns the signed exception response letter to Senior Executive for Telecommunication Services for distribution.

- 7) Senior Executive for Telecommunication Services e-mails the letter to the requesting ATS with copy to Supplier Engagement.
- 8) Supplier Engagement will record the decision and ensure all GSA stakeholders are aware of the approved exception.
- 9) If approved, the agency is responsible for providing the approved letter to its contractor for submission with each modification(s) in the NHC.
- 10) If disapproved, the contractor will not have a letter to submit with the modification(s), and the CORs will reject any modifications the contractor submits.

## **8 Rollout Plan & Notifications**

A separate document details the communications plan for the announcement to freeze new services and limit use of contract extensions to external audiences. A summary of the communications plan appears below.

### **8.1 Letter to Agency Transition Sponsors**

The Assistant Commissioner for ITC sent a letter on March 11, 2020 to ATSs with copies to LTMs and TOCOs announcing GSA's approach to limiting users, freezing mods and orders, and the exception process. A copy of this letter is in Appendix D: Letter to Agency Transition Sponsors March 2020.

### **8.2 Draft NAUL Workbook and Companion Letter**

The contracting officers sent their respective contractors a draft NAUL Workbook and a companion letter that explains:

- 1) After April 1, 2020, Networx Universal mods will be processed only for agencies on the NAUL.
- 2) After May 31, 2020, Networx Enterprise and WITS 3, mods will be processed only for agencies on the NAUL.
- 3) After October 1, 2020 for agencies who remain on the NAUL, no mods will be processed without an approved exception letter, which must accompany modification submission to the NHC. The agency is responsible for providing an approved exception letter to the contractor to accompany the modification.

### **8.3 Public Notification**

Notification to the public will be accomplished through updates to "Special Alert" section of Networx, WITS 3, EIS, and Local Telecommunications websites and addition to the EIS Transition website.

### **8.4 Congressional Notification**

GSA will include a description of the NAUL process in responses to Questions for the Record from the House Committee on Government Reform from a March 4, 2020 hearing.

## 9 Roles and Responsibilities

The table below identifies stakeholders and their roles and responsibilities that contribute to the successful implementation of the Closeout Project.

Stakeholders	Responsibility
GSA Executives	Review, concur, and approve requests.
Senior Executive for Telecommunication Services	Designate GSA personnel for the Closeout Core Team. Adjudicate modification exception requests from agencies, inform GSA stakeholders and executives of decisions, email response to requesting agencies. Adjudicate NAUL recommendations, inform GSA stakeholders, sign warning letters, adjudicate NAUL removal appeals, sign the NAUL.
Director, IT Acquisition Operations	Receive a copy of the proposed revised NAUL.
GSA Contracting Officers for Networx and WITS 3	Send contractors the proposed and revised NAUL Workbook; include companion letter.
Transition Program Director	Continue to manage Transition Program: track progress, identify and mitigate risks, initiate escalations as needed.
Supplier Engagement	Enforce freeze on mods and new services and administer exception process. Write companion letter for NAUL if needed. Post NAUL to NHC.
Limiting Use Transition PM	Administer the NAUL process: Identify agencies to remove from NAUL; prepare warning letter to agencies proposed to be removed from NAUL; send signed warning letter.
Closeout Core Team	Come to consensus on criteria for each phase and agencies to be removed from NAUL in each phase.
TI Lead	Create TI Summary by contractor, by service. Track and report disconnects.
Order Writing Center	Initiate Regional local service disconnect process.
Service Delivery	Enforce freeze on Regional local service orders.
CORs	Monitor contractor performance, identify and mitigate risks, initiate escalations as needed.
Agency Managers	Designate assigned agencies as non-responsive and provide history. Communicate plans and timelines with assigned agencies.
Technology Service Manager	Designate assigned agencies as non-responsive and provide history. Communicate plans and timelines with assigned agencies.
Agency Transition Sponsor	Receive and respond to warning letters. Submit exception requests for mods.
Networx and WITS 3 Contractors	Provide feedback to GSA on agencies to be removed from NAUL and TI discrepancies. Disconnect agencies removed from NAUL.

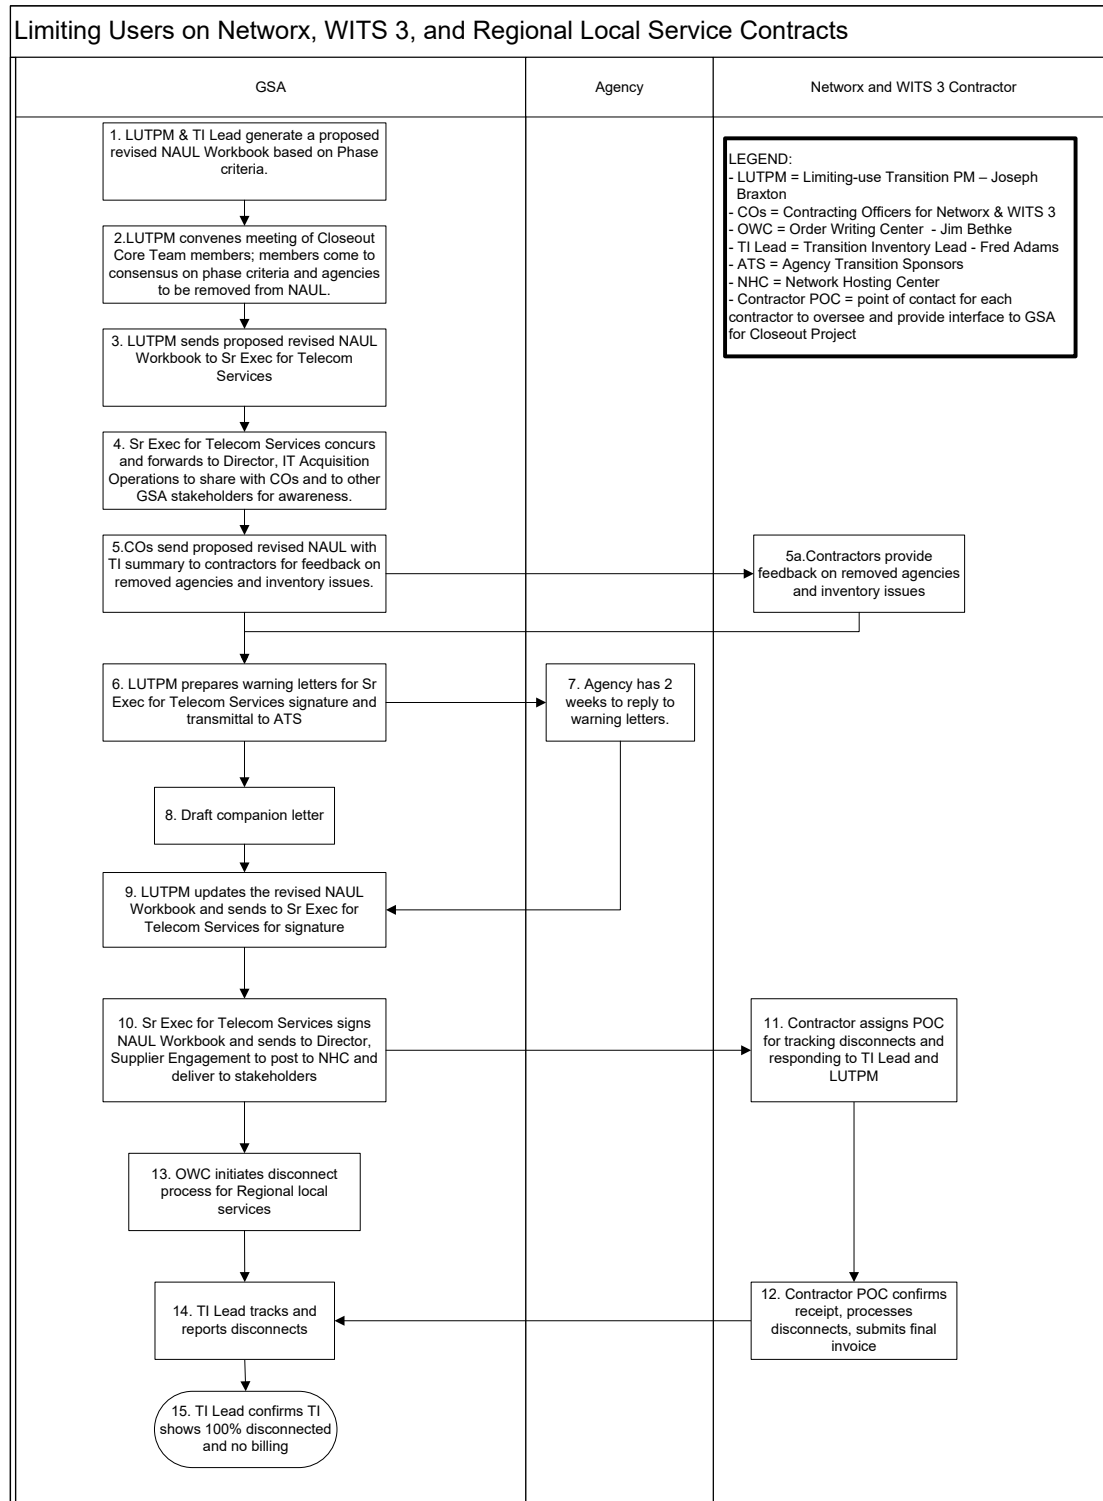

Stakeholders	Responsibility
Regional Local Service contractors	Comply with GSA's requests for disconnects.
Other GSA Division Directors and Branch Chiefs	Remain aware of project activities, inform respective branch personnel, and respond according to organizational roles.

## Appendix B: Process Flow for Limiting Users

The below flowchart depicts the process for limiting users on the expiring contracts.

## Appendix C: Memorandum - Plan for Limiting Users on Extended Contracts

July 15, 2019

MEMORANDUM FOR: Alan B. Thomas, Jr.  
Commissioner  
Federal Acquisition Service

FROM: William Zielinski   
Assistant Commissioner, Information Technology Category  
Federal Acquisition Service, GSA

SUBJECT: Plan for Limiting Users on Extended Contracts

As a condition of extending the expiring Networkx, Washington Interagency Telecommunications System (WITS) 3, and Local Services contracts, GSA will require agencies to meet certain critical milestones in order to be eligible for an extension. This memorandum outlines the plan for enforcing the condition.

The Office of Information Technology Category (ITC) is making the Federal Acquisition Service (FAS) Commissioner formally aware of this extension plan in advance of communication to customer agencies as well as to the affected contractors.

GSA has sent agencies written agreements to sign, committing to award their task orders by September 30, 2019. Further, these agreements inform the agencies that administrative fees on the expiring contracts may increase; and processing contract modifications and new service orders on the expiring contracts may be curtailed during the extended time period.

To enforce this condition, ITC will include the following language in the extended contracts:

*Beginning at a time to be determined after March 31, 2020, GSA will begin ordering a gradual disconnection of services for agencies that have not made adequate progress in the transition to EIS. This will be accomplished through a series of targeted warning notices to agencies and subsequent disconnect orders from GSA to Networkx, WITS 3, and local service contractors. The contractor shall have all disconnect orders completed by the dates identified in the disconnect orders and cease billing effective as of those dates.*

*GSA intends to conduct the disconnects in phases. GSA will determine the phasing based on the following: the agency's completion of task order awards on EIS, other indications of activity and progress in transition, along with considering other special circumstances as outlined in the attached Addendum. Most agencies' disconnects shall be completed no later than September 30, 2022. GSA may approve, under extreme*

*circumstances, a few specific agencies to extend the use of the contract through an "Emergency Action Period" with disconnects to be completed by May 31, 2023.*

*During the contract extension process, GSA will present the contractor with a list of agencies that may be limited in their use of the extended contract according to the process described above. GSA will indicate whether the agency has awarded its EIS task orders and how many active services remain on the contract.*

GSA will implement the enforcement according to the plan outlined in the attached addendum. If you have any questions, please contact Allen Hill, Director of the Office of Telecommunications Services at [allen.hill@gsa.gov](mailto:allen.hill@gsa.gov) or 202-701-7891.

ATTACHMENT 1: Addendum: Detailed Objectives and Approach for Extension Plan

**Addendum: Detailed Objectives and Approach for Extension Plan****a) Objectives**

- i) Limit the use of extended contracts to agencies demonstrating progress on transition to EIS
- ii) Avoid a large-scale disruption in telecom and networking services across the Federal Government at the expiration of the Networx and LSA contracts
- iii) Minimize the risk of adverse impacts to Agencies' operations
- iv) Reduce the expense of administering the extended expiring contracts (Networx, WITS 3, and LSAs) simultaneously with the EIS contracts
- v) Disconnect agencies, in phases, to meet September 30, 2022 milestone for 100% completion of transition
- vi) Authorize a limited number of agencies for Emergency Action Period, October 2022 through May 2023
- vii) Assist a small number of agencies with sole-source task order on EIS, May 2023 through definitive end date

**b) Approach**

- i) Track each agency's progress on:
  - 1) Submitting solicitations for GSA scope review
  - 2) Releasing solicitations to Industry for proposal
  - 3) Awarding task orders by September 30, 2019
  - 4) Impacts and special circumstances due to factors such as, but not limited to, 1) protest, 2) lacking Authority to Operate, 3) lapse in appropriations or government shutdown, 4) GSA-Assisted acquisitions for small agencies, and 5) EIS contract modifications
- ii) Confirm agency's situation, contacts, and inventory and put into phases, such as:
  - P1. Services with no identifiable owner and non-responsive agencies
  - P2. No solicitations submitted for scope review
  - P3. No solicitations released to industry
  - P4. Solicitations released but not awarded, no protest
  - P5. Solicitations released but under protest
  - P6. Contractor-delayed installs and disconnects
  - P7. Task orders awarded but services not expected to cutover by May 2023
- iii) Warning letter to agency
- iv) Disconnect "order" letter to contractors
  - 1) Date of first phase of disconnect orders is TBD, date of last phase is August 2022
  - 2) 30 days to disconnect
  - 3) No billing after disconnect
- v) Emergency Action Period
  - 1) GSA invites agency to submit request
  - 2) Request to GSA from Agency Transition Sponsor by March 2022

- 3) At least 30 days prior to the expiration of each extended contract, each Contracting Officer will issue a contract modification that 1) invokes the extension under Clause 52.217-8 Option to Extend Services and 2) modifies Clause H.2 with the new list of authorized users
- vi) Sole Source Transition
  - 1) Agency will prepare and approve sole source justification and award short-term task order to temporarily move services from expiring contract to same service provider's EIS contract, if this is a possibility
  - 2) Agency subsequently completes transition to EIS provider previously selected through Fair Opportunity process
  - 3) GSA will assist, but the agency will be solely responsible for justification and task order acquisition

**Appendix D: Letter to Agency Transition Sponsors March 2020**

GSA Federal Acquisition Service

March 11, 2020

Dear Agency Transition Sponsor:

Enterprise Infrastructure Solutions (EIS), the General Services Administration's (GSA's) 15-year, \$50 billion contract vehicle, was designed to help meet agency mission needs by providing customer agencies with secure, resilient, cost-effective, innovative, and high-quality telecommunications solutions. The Federal Government is currently in the middle of the transition from the expiring Networkx, Washington Interagency Telecommunications System (WITS) 3, and Regional Local Service Agreement (LSA) contracts to the EIS contracts. This letter provides EIS Agency Transition Sponsors with an update on the actions GSA is taking to help ensure a timely and effective transition of all inventory from these expiring contracts onto EIS.

The expiring Networkx, WITS 3, and Regional LSA contracts were originally extended to 2020. As a result of delays in transition to the EIS contracts and requests from agencies, GSA is extending the expiring contracts by an additional three years to May 2023. These extensions allow the necessary time for agencies to complete transition and modernize.

In order for an agency to be eligible to continue using the contracts during the extension period, each agency must agree to meet certain critical milestones or GSA will take steps to limit the use of the extended contracts. GSA is also taking steps to curtail the growth of services on the extended contracts by freezing modifications while deploying resources to process EIS modifications for agencies awaiting solicitation award. Additionally, GSA intends to refocus its direct contractor-provided transition support to agencies.

**Limiting Use of Extended Contracts**

On March 31, 2020, GSA will begin to limit the use of its extended contracts for agencies that are not making progress towards transition. While the deadline for agencies to award task orders was September 30, 2019, GSA continues to monitor all transition activities that indicate progress, including solicitation release, task order awards, and disconnection of services from the extended contracts.

After March 31, 2020, GSA will disconnect agencies, in phases, to meet the September 30, 2022 milestone for 100% completion of transition. The first phase will include agencies that have been "non-responsive" to transition outreach from GSA. Future phases will be based on each agency's status at that time and the individual circumstances impacting that agency's transition progress, such as protests or pending contract modifications. The Agency Transition Sponsor will receive a notification before any services are disconnected, and there will be an opportunity for appeal.

**Freezing Modifications on Extended Contracts**

Effective October 1, 2020, GSA will implement controls on its extended Networkx, WITS 3, and LSA contracts by freezing all future growth on these vehicles. Specifically, on the Networkx (Universal and Enterprise) and WITS 3 contracts, GSA will cease processing all contract modifications for new requirements. This control refers to modifications to the GSA contracts, not to agencies' task orders. For GSA's Full Service Program, including the LSA contracts, GSA

U.S. General Services Administration  
1800 F Street, NW  
Washington, DC 20405  
[www.gsa.gov](http://www.gsa.gov)

will no longer fulfill any requests for additional services. All new services required by your agency should be provided under the EIS contracts.

GSA understands that in very rare cases, an agency may have a need that requires GSA to modify the extended contracts. To request a modification exception after the October 1, 2020 restriction date, the Agency Transition Sponsor may provide the justification and required time-frame for the new requirement to Mr. Allen Hill, GSA's Executive Director of the Office of Telecommunications Services. The justification should include why the requirement cannot be fulfilled under EIS. GSA will review and adjudicate your exception request.

**Modifications on EIS Contracts**

As the transition off extended contracts progresses, the quantity of EIS modifications will continue to grow. GSA recognizes that many agencies have released their solicitations to the EIS suppliers and are waiting for contract modifications related to their solicitations to be evaluated and awarded by GSA. GSA is prioritizing modifications needed for agency awards. At the same time, the Networkx contracts are on pace to process approximately 2,000 contract modifications in this fiscal year with the same GSA resources. These variables are driving the need to initiate the freeze of modifications on the extended contracts.

**Contractor-Provided Transition Support**

GSA will refocus direct contractor-provided transition support. As originally planned for October 1, 2020, GSA will no longer provide agencies with support for EIS solicitation development/evaluation and post-award transition through the Transition Ordering Assistance Task Order. Agencies are encouraged to perform this work for Fiscal Year 2021 using other agency contract vehicles or in-house resources. As an alternative, GSA is exploring the means to provide more technical engineering assistance for network, voice, and cloud transition, and will continue to communicate with agencies as the approach develops.

If you have any questions or concerns, please contact Allen Hill, Executive Director, GSA's Office of Telecommunications Services at [allen.hill@gsa.gov](mailto:allen.hill@gsa.gov) or (202) 701-7891.

Sincerely,

William Zielinski  
Assistant Commissioner  
Information Technology Category, Federal Acquisition Service

cc: Lead Transition Manager and Transition Ordering Contracting Officer
